The Source of Motor Trouble is not Always Under the Hood

YOU do not look into your gasoline tank to find the cause of engine troubles, but you might find it there.

Automobile motors require a good, steady diet of balanced gasoline. If the distilled product varies because of changing qualities of the crude oil from which it is refined, your gasoline is one-sided. Every oil field produces petroleum rich in certain properties, but lacking in others.

The Standard Oil Company (New Jersey) has eliminated numerous motor troubles and much gasoline wastage by de-

veloping a motor fuel which is not only properly balanced, but is the same day after day—to the last ounce—wherever and whenever you buy it. It starts the motor in a hurry, burns up cleanly, and delivers exceptional pulling power.

We have never claimed merits for our products which you could not prove for yourself. We recommend that you get a tankful of "Standard" Motor Gasoline and give it a thorough trial. You will quickly note the advantages of a completely balanced gasoline.
